iSolved®

IQ 200 TIME CLOCK

The entry-level unit from iSolved is perfect for small-to-midsized companies looking to perform primarily monitor time and attendance. It includes a USB port that allows for easy data transfer without internet or modem connectivity. Simply insert a USB flash drive and quickly download time punch data that can then be uploaded later to TimeForce, iSolved TimeForce, and iSolved Time.

USB Flash Drive Support!

The IQ 200 from iSolved is an ideal entry-level time clock for small-to-midsize companies using TimeForce, iSolved TimeForce, and iSolved Time.

Employee punches are sent to TimeForce, iSolved TimeForce, and iSolved Time via On Demand, a robust communications program that provides real-time operations as well as remote time clock configuration.

For customers without ethernet connections at the desired mounting location, or for situations when your network is down, the IQ 200 can store employee punches on a USB flash drive for transport back to TimeForce, iSolved TimeForce, or iSolved Time.

Employees can punch in and out for work as well as on / off from meals and breaks.

The IQ 200 is designed and manufactured by iSolved in the United States. We go this extra step to ensure the highest performing and reliable products for our customers.
